

**AQUABOX garbage container** is a reliable, stable and easy for use. It is made of high strength polyethylene, resistant to admissible temperature differences from  $-40$  to  $+60$  C.

Two wheels, located in the base of the container, make it easy to transport. Skillfully made lid with the seal allows to close the container and to avoid leakage of unpleasant odor.

Carrying capacity of the container makes 250 kg (at its own weight of 14,5 kg). The container is able to stand great load and it will be your irreplaceable assistant in your household.

Purchasing "Aquahome" container you will solve the problem of rubbish removal in industrial, commercial and home spheres.

Name	Height H, mm	Width (A), mm	Depth (B), mm	Capacity,l
Garbage container	1200	630	660	240
