

"Aquaroom" AMTC is designed and created by the best home and foreign specialists. It complies with the strictest modern requirements. The polyethylene underpan (base) as compared with the wooden bases of the other mobile toilet cabins provides a strong and long living structure. The polyethylene base doesn't require any additional protection.

One of the advantages of "Aquaroom" AMTC is its accumulator tank. The capacity of this tank makes 300 l, compared with 200 and 220 liters of similar cabins of other home and foreign make.

300 liters tank is the most optimal decision as it provides for more than 500 entries, while the cabin area stays the same as that with the tank of 370 liters.

Ventilation system of "Aquaroom" AMTC prevents the accumulation of unpleasant and harmful odor inside the cabin. "Aquaroom" AMTC doesn't require the installation of additional lightning system. Thanks to the white color of the roof there is enough natural light in the cabin during the daytime. For the night time illumination it is enough to locate the cabin close to the street lighting.

The standard set of "Aquaroom" AMTC includes a sink, a washbasin, a paper-hold, a hook for handbags and clothes, a latch with "Close/Open" indication and a handle.

Additionally "Aquaroom" AMTC are equipped with lightning and heating systems, a towel-hold, a mirror, a dispenser for liquid soap. Upon the consumer's request "Aquaroom" AMTC can be manufactured in any color spectrum. It is possible to place the company's logo and address on the side walls and on the door.

The Toilet Cabins are made of strong polyethylene of foreign make, resistant to temperature difference from  $-40_{\circ}$  to  $+60_{\circ}$  that allow using them both in areas of hot climate and in the regions of Far North.

Special additives to the polyethylene make these cabins resistant to direct UV sunlight impact. "Aquaroom" cabins are lightweight that simplifies the issue of their transportation both in assembled and disassembled form.

All deodorant and disinfecting liquids for toilet cabins you can purchase at "Aquatech" representative office.
