

Aquatech representative office is ready to offer a row of novelties.

Among them are pontoons for mini-berth construction, beacons for navigating channels designation, buoys for marking of different points on the water surface (used in petroleum production industry and fishery), floats for fishing nets, mooring buffers (for protection of the boat body), europallets, communication wells (for equipment installation).

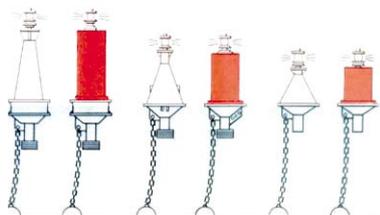

Pontoon

Beacon

Buoy for marking of point on the water surface

Buoys for the river water ways marking

Vertical traffic signs

Floats for the fishing nets

Europallet

Mooring buffer

Communication well
